Week 2 Spring 2 2025

We have had a fun packed week as we celebrated Pancake Day - we learnt how to mix and cook a pancake. We then ordered pictures on how to do this. We decorated our own paper pancake with our favourite toppings to take home. We also got to taste 4 different toppings on a small piece of pancake and then helped the Year 1 children find out which topping was the most popular. There was no chocolate topping this year which made it harder to guess which would be the favourite. Do come in and see the results! We also had fun trying to flip cardboard pancakes in our yard and having pancake races. Inside we had lots of pancake related 'Rainbow cards' to try out including 'I spy pancake counting', sorting pancake ingredients into sets and explaining our reasons alongside creating fun pancakes with our playdough amongst others.

The children have started learning about plants through their new topic 'What's in the garden?', we looked at what a plant is and whether all plants look the same. We have started to identify some common plants and then found out what they need to grow. We helped set up a cress growing experiment where we put cress seeds in four different containers each with a different set of conditions in terms of whether they have soil, water or light. The children then made predictions on which they thought would grow - we look forward to seeing if they were right.

We finished the week with World Book Day - a day of great excitement as children came dressed as favourite characters and brought their favourite book to share with their friends. They took part in many activities designed to foster that love of books and reading and they all had a fantastic day. We got to read so many of the fabulous books it was a real treat! Do pop in next week at Open Door to see some of these activities.

Next week will bring more excitement as it is 'Science Week'!

As always please do come and ask if you have any questions.
